SAPPHIRE WALL SYSTEM

The Sapphire Wall System by Skutchi Designs Inc® is an innovative interior office wall solution designed to create efficiently divided work environments for new or existing office spaces. This highly versatile modular panel system—with heights ranging from 7', 8' or 9'ft—utilize incredibly strong yet lightweight aluminum frames with connectors to create freestanding structures without permanent attachments to the floor or ceiling of your office space. Fully demountable and expandable, the Sapphire Wall System can be reconfigured at will to move or adapt with your office space's needs.

You can customize the 3 1/4" thick panels in a variety of ways (all tempered glass panels or a mix of glass, laminate, and fabric panels) which can be fabricated with your choice of 14 different color fabric options and 4 different laminate options. Use the Sapphire Wall System within your existing workspace to create private areas such as individual offices, conference rooms, massage therapy rooms, tanning bed areas, medical office examination rooms, changing rooms, hospitality spaces, lactation rooms, study spaces, phone booth areas, or wherever privacy is essential in a working environment.

Additionally, the Sapphire Wall System offers three types of lockable doors which can be added to any configuration of walls systems over 7' high. If your space requires electrical outlets or data network cable, the Sapphire Wall System offers built-in "raceways" to provide hidden and seamless electric and data integration. All materials used with the Sapphire Wall System meet or exceed the safety and durability specifications set forth by the American National Standards Institute and the Business and Institutional Furniture Manufacturers Association.

The Sapphire Wall System is fully compatible and integrates seamlessly with any items available in our Sapphire Cubicle System inventory, which includes ergonomically designed furniture and accessories such as workstation desks, sit to stand desks, file storage, shelving, overhead storage, chairs, padded benches, paper racks, and accessory rails.

The Sapphire Wall System is an elegant, modular wall alternative to traditional drywall construction (which can take weeks of planning and implementation). Depending upon the size and complexity of most configurations, the Sapphire walls can usually be erected in less than a day with little to no mess.

When you consider the cost, construction, durability, permanence, and lack of potential tax benefits of traditional drywall construction versus the Sapphire Wall System, the choice is easy. The Sapphire Wall System is a perfect and cost effective solution to innovative and efficiently divided work environments for new or existing office spaces.

- 6" electric and cable raceway on the base of each panel
- Panel thickness: 3 1/4"
- Glass thickness: 3/8"
- Frames & connections: Aluminum
- Doors available for wall systems 84"H-108"H
- Optional interior furnishings available
- Custom and quick-ship options available
- ANSI/BIFMA
- Fabric ISO 9001
- Electric: UL Listed
- Fire Tested
- VOC Tested

Sliding Door Lock

Locks are available on bottom only of sliding doors. **Spring lock**-a 1" deep hole must be drilled in floor to engage lock.

Swinging Door Lock

Swinging doors come with locks attached to handles.

Door Placement Options

Use the letter of the side that you want the door on. Put that letter in front of the number that corresponds to the desired door position on that side.

	BS 5852 Part I: 1979, Match Test			Pass	

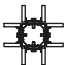

Installation Parts

Parts needed and used for installation of the Sapphire Wall System.

		SKU	Dimensions	Weight
	Top Groove Stabilizer (Top Beam 10' runs, cut to size)	SAP-TB	10' runs (cut to size)	13 lb
	Stack-up Connector	SAP-SUC	—	2 lb
	Hex Bolts	HEX	—	1 lb
	Sheet Metal Screws	SMSCR	—	1 lb
	Light Blocker (Small/Large)	SAP-LT-SMALL-BLK SAP-LT-LG-BLK	—	1 lb
	End Trim	SAP-108-ET	108"	3 lb
	Wall Starter	SAP-WS	84" Wall Starter 96" Wall Starter 108" Wall Starter	10 lb 10 lb 10 lb
	Bottom Track - Optional (see below)	SAP-BG	—	9.5 lb
	Without Bottom Track			
	With Bottom Track			

Connectors

Connectors are needed to create a 2-way, 3-way, 4-way, or 120 degree angle.

	Description	SKU	Dimensions	Weight
	4-Way Connector	SAP-84-4WAY SAP-95-4WAY SAP-108-4WAY	84" 4-Way Connector 95" 4-Way Connector 108" 4-Way Connector	10 lb
	3-Way Connector	SAP-84-3WAY SAP-95-3WAY SAP-108-3WAY	84" 3-Way Connector 95" 3-Way Connector 108" 3-Way Connector	10 lb
	2-Way Connector	SAP-84-2WAY SAP-95-2WAY SAP-108-2WAY	84" 2-Way Connector 95" 2-Way Connector 108" 2-Way Connector	10 lb
	Straight Panel to Panel Connector	SAP-84-PP SAP-95-PP SAP-108-PP	84" Panel to Panel Connector 95" Panel to Panel Connector 108" Panel to Panel Connector	10 lb
	120 Degree 2-Way Connector	SAP-84-120-2WAY SAP-95-120-2WAY SAP-108-120-2WAY	84" 120° Connector 95" 120° Connector 108" 120° Connector	10 lb
	120 Degree 3-Way Connector	SAP-84-120-3WAY SAP-95-120-3WAY SAP-108-120-3WAY	84" 120° Connector 95" 120° Connector 108" 120° Connector	10 lb

Electric and Data can be added to the baseline of each panel using the 6" electric and data raceways.

	Description	SKU	Dimensions	Weight
	31" Flex Cable	31-8W-4C	31"	2 lb
	54" Flex Cable	54-8W-4C	54"	2 lb
	68" Flex Cable	68-8W-4C	68"	3 lb
	NYC Base Power Feed with Junction Box and 60" Whip	8W-4C-BASE	60"	4 lb
	8 Wire, 4 Circuit Double Sided Power Module	8W-4C-DS	—	1 lb
	Black Blank Outlet	BLANK-REC-8W-4C	—	1 lb
	8W-4C 1 Receptacle Circuit	1-REC-8W-4C	—	1 lb
	8W-4C 2 Receptacle Circuit	2-REC-8W-4C	—	1 lb
	8W-4C 4 Receptacle Circuit	4-REC-8W-4C	—	1 lb
	8W-4W Dedicated Orange Circuit Used for large machines (ex. lg. printers)	3-REC-8W-4C-ISOLATED	—	1 lb
	Wire Snake	WM-SN	—	1 lb
	Phone Jack	AT34-15	—	1 lb
	CAT 6 Jack	AT66-20	—	1 lb
	Data Blank	AT31-00	—	1 lb
	Filler Cap For Data Plates	FILL-CAP	—	1 lb
	Data Plate	AT4FM	—	1 lb

Sapphire Wall System Electric Raceway -Closed

Sapphire Wall System Electric Raceway -Open

FINAL CONNECTION IS DONE BY A LICENSED ELECTRICIAN

WARNING: Risk of fire or electric shock. As with all non-directional systems, do not electrically connect panel to more than one supply source. Always determine that the panel is electrically connected to one and only one source of supply. Before using any equipment, check the entire system for polarity, continuity, and grounding integrity.

Example System

8 WIRE 3 CIRCUIT DIAGRAM
(83 SYSTEM)

Power Supply Connection

The Power System is an eight wire system consisting of four individual circuits rated at 20 amps/120 volts maximum. Circuit 1 (black), circuit 2 (red), and circuit 4 (pink), are served by a system neutral (white) and an equipment ground (green). Circuit 3 (blue) uses an isolated neutral (gray), and an isolated ground (green/yellow). The system may be supplied by a three phase power system with four individual circuits rated 20 amps/120 volts maximum, or as permitted by local code.

When connecting electric pass throughs to power moduls, please make sure ARROW is up

Environmentally Sustainable

Our stone wool production process uses some of the most advanced technology available. The last decade has seen a new generation of ROXUL manufacturing advancements designed to lower our environmental footprint. These endeavors have included:

- the capture and recycling of rainwater;
- reduction in energy consumption;
- recycling of raw materials back into the production process;
- the use of natural lighting in our facilities; and
- repurposing water used during the manufacturing process.

Moisture Resistance

ROCKBOARD® 40/60/80 ASTM C 1104	Moisture Sorption	<0.08%
------------------------------------	-------------------	--------

tile over rockboard

Part I. Test Conducted:

ANSI/BIFMA X5.6-2016 Panel Systems - Tests.

Test and Requirements	Test Results
4 Panel Flammability Test The Flame Spread (FS) index shall be 200 or less. The Smoke Developed (SD) index shall be 450 or less. If the Smoke Developed index exceeds 450, the product shall be labeled to indicate that the Smoke Developed index exceeds 450.	PASS FSI: 55 SDI:200

14 Wear and Fatigue Test for Vertically Hinged and Horizontally Sliding Access Doors Cycle the door for a total of 20,000 cycles. The cyclic rate shall be 8 ± 4 cycles per minute unless the rate is controlled by the door operating mechanisms. There shall be no loss of serviceability to the door unit or its components.	PASS
---	------

Predicted Concentrations in the defined Typical Office Environment of a Single Office Workstation:

Compounds	Unit	Concentration		Limits of indoor air concentration	
		Office1	Office2	Systems Furniture	Seating
TVOCtoluene	mg/m ³	0.007	0.003	≤ 0.5	≤ 0.25
Formaldehyde	ppb	5.657	2.449	≤ 50	≤ 25
Total Aldehydes	ppb	6.546	2.833	≤ 100	≤ 50
4-Phenylcyclohexene	mg/m ³	ND	ND	≤ 0.0065	≤ 0.00325

ND=not detectable

Remark:

1. Office 1: Typical open plan office environment, its clean air ventilation rate $Q_0 = 15.0\text{m}^3/\text{h}$ or $Q_0 = 24.8\text{m}^3/\text{h}$ (for seating)
2. Office 2: Typical private office environment, its clean air ventilation rate $Q_0 = 34.7\text{m}^3/\text{h}$ or $Q_0 = 24.8\text{m}^3/\text{h}$ (for seating)
3. Data at the 168th hour was used to calculate and compare with the emission limits.
