

SAPPHIRE CUBICLESYSTEM Installation Guide

39"H, 52"H and 65'H

Tools Needed for Installation

(Professional Assembly **Recommended**)

Mallet

Chop Saw

Level

Pry Bar

Double-Sided Tape

Quick Tips

- 1. Unpack all product before assembly
- 2. 3 person installation
- 3. Make sure all panels are level
- 4. Frame entire office before installing tiles. *MAKE SURE TO INSTALL END CAP BEFORE **INSTALLING TILES**
- 5. Professional installation recommended.
- 6. **If your floor plan does not fit exactly with our sizes we suggest the following: A contractor may be hired to build out wall to meet measurements. This is called a knee wall and very common in the industry when odd measurements are left. This will make a finished look.

End Cap

Reception Transaction Top Assembly

The panel top caps are attached to the transaction tops. **1.** Snap the top cap/transaction top to the panel

FINAL CONNECTION IS DONE BY A LICENSED ELECTRICIAN

WARNING:

ING: Risk of fire or electric shock. As with all non-directional systems, do not electrically connect panel to more than one supply source. Always determine that the panel is electrically connected to one and only one source of supply. Before using any equipment, check the entire system for polarity, continuity, and grounding integrity.

Power Supply Connection

The Power System is an eight wire system consisting of four individual circuits rated at 20 amps/120 volts maximum. Circuit 1 (black), circuit 2 (red), and circuit 4 (pink), are served by a system neutral (white) and an equpiment ground (green). Circuit 3 (blue) uses an isolated neutral (gray), and an isolated ground (green/yellow). The system may be supplied by a three phase power system with four individual circuits rated 20 amps/120 volts maximum, or as perimtted by local code.

When connecting electric pass throughs to power moduals, please make sure ARROW is up
