SAPPHIRE WALL SYSTEM

The Sapphire Wall System by Skutchi Designs Inc® is an innovative interior office wall solution designed to create efficiently divided work environments for new or existing office spaces. This highly versatile modular panel system—with heights ranging from 7', 8' or 9'—utilize incredibly strong yet lightweight aluminum frames with connectors to create freestanding structures without permanent attachments to the floor or ceiling of your office space. Fully demountable and expandable, the Sapphire Wall System can be reconfigured at will to move or adapt with your office space needs.

You can customize the 3 1/4" thick panels in a variety of ways (tempered glass panels or a mix of glass, laminate, pet, greenery, slatwall, sheer, and fabric panels). Use the Sapphire Wall System within your existing workspace to create private areas such as individual offices, conference rooms, massage therapy rooms, tanning bed areas, medical office examination rooms, changing rooms, hospitality spaces, lactation rooms, study spaces, phone booth areas, or wherever privacy is essential in a working environment.

Additionally, the Sapphire Wall System offers two types of lockable doors which can be added to any configuration of walls systems over 7' or higher. If your space requires electrical outlets or data network cable, the Sapphire Wall System offers built-in "raceways" to provide hidden and seamless electric and data integration. All materials used with the Sapphire Wall System meet or exceed the safety and durability specifications set forth by the American National Standards Institute and the Business and Institutional Furniture Manufacturers Association.

The Sapphire Wall System is fully compatible and integrates seamlessly with any items available in our Sapphire Cubicle System inventory, which includes ergonomically designed furniture and accessories such as workstation desks, sit to stand desks, file storage, shelving, overhead storage, chairs, padded benches, paper racks, and accessory rails.

The Sapphire Wall System is an elegant, modular wall alternative to traditional drywall construction (which can take weeks of planning and implementation). Depending upon the size and complexity of most configurations, the Sapphire walls can usually be erected in less than a day with little to no mess.

When you consider the cost, construction, durability, permanence, and lack of potential tax benefits of traditional drywall construction versus the Sapphire Wall System, the choice is easy. The Sapphire Wall System is a perfect and cost effective solution to innovative and efficiently divided work environments for new or existing office spaces.

*Sheer film for full glass tiles. Shown on 2ft panels. 1.75" bleed around all panels.

Optional Earthquake Straps

Please see installation guide for full install instructions

Place earthquake straps as seen below, and bottom track on top

Top View

* You only use one strap per panel

Side View

Add another earthquake strap at each of the T-connectors.

⚠ FINAL CONNECTION IS DONE BY A LICENSED ELECTRICIAN

WARNING: Risk of fire or electric shock. As with all non-directional systems, do not electrically connect panel to more than one supply source. Always determine that the panel is electrically connected to one and only one source of supply. Before using any equipment, check the entire system for polarity, continuity, and grounding integrity.

Example System

Power Supply Connection

The Power System is an eight wire system consisting of four individual circuits rated at 20 amps/120 volts maximum. Circuit 1 (black), circuit 2 (red), and circuit 4 (pink), are served by a system neutral (white) and an equipment ground (green). Circuit 3 (blue) uses an isolated neutral (gray), and an isolated ground (green/yellow). The system may be supplied by a three phase power system with four individual circuits rated 20 amps/120 volts maximum, or as permitted by local code.

Care & Cleanability

Cleaning code **W** - Spot clean only with water-based upholstery shampoo or foam upholstery cleaner. Pretest a small, inconspicuous area before proceeding. Do not over wet. Do not use solvents to spot clean. Cushion covers should not be removed and laundered. When cleaning a spill, blot immediately to remove the spilled material. Evenly clean the entire panel in a seam to seam fashion. Do not clean just the spots or stains. When an overall soiled condition has been reached and professional care is required, contact an IICRC certified firm (www.iicrc.org).

Part I. Test Conducted:

ANSI/BIFMA X5.6-2016 Panel Systems - Tests.

Test and Requirements	Test Results
4 Panel Flammability Test The Flame Spread (FS) index shall be 200 or less. The Smoke Developed (SD) index shall be 450 or less. If the Smoke Developed index exceeds 450, the product shall be labeled to indicate that the Smoke Developed index exceeds 450.	PASS FSI: 55 SDI:200
14 Wear and Fatigue Test for Vertically Hinged and Horizontally Sliding Access Doors Cycle the door for a total of 20,000 cycles. The cyclic rate shall be 8 ± 4 cycles per minute unless the rate is controlled by the door operating mechanisms. There shall be no loss of serviceability to the door unit or its components.	PASS

Environmentally Sustainable

Our stone wool production process uses some of the most advanced technology available. The last decade has seen a new generation of ROXUL manufacturing advancements designed to lower our environmental footprint. These endeavors have included:

- the capture and recycling of rainwater;
- reduction in energy consumption;
- recycling of raw materials back into the production process;
- the use of natural lighting in our facilities; and
- repurposing water used during the manufacturing process.
